Foreword

Once again this year, the Régie des rentes du Québec presents its annual statistical review. **Statistics Outlook** succinctly describes the workings of the two programs administered by the Régie – the Québec Pension Plan and Québec Family Allowances.

The primary intent of the Régie when it first published this annual review four years ago has not changed: to provide the public with general social and economic statistics pertaining to these two programs.

The Québec Pension Plan guarantees workers and their families basic protection upon retirement or in the event of death or disability. For this purpose, the Régie keeps the Record of Earnings, studies applications for benefits, and pays out the benefits. Under the Family Allowances Act, the Régie ensures the payment of allowances for all unmarried children under the age of 18, and of the supplementary allowance for children who are affected by a severe handicap.

The statistics presented in this periodical are either general, tracing developments over a number of years, or more detailed, focusing on demographic or geographic factors. In both cases, they provide information that is essential to reflection and study and which allows us to identify some of the problems related to income security.

The Régie des rentes hopes that persons interested in the field of income security will find **Statistics Outlook** helpful in providing the information they need.

QUEBEC PENSION PLAN

Definitions

Age

In the case of a beneficiary, the age attained upon his last birthday.

In the case of a contributor, the age attained during the year in question. For the death benefit, the contributor's age is the age attained upon his last birthday before his death.

Average actual earnings

Average of the earnings entered in the Record of Earnings. However, contributors whose earnings are 100 000 \$ or more are deemed to have received earnings of 99 999 \$ for the calculation of the average.

Average monthly benefit

The average is calculated by dividing the sum of the monthly benefits by the number of these benefits. Retroactive payments, sums recovered and sums withheld are not taken into account in the calculation.

Average pensionable earnings

Average earnings considered for the purposes of the Québec Pension Plan, before any adjustment of these earnings.

Beneficiary

Person receiving a payment for a given month. Adjustments made in the case of death benefits are not considered as payments to beneficiaries.

Category of contributor

Classification of the worker depending on whether he is employed or self-employed, or both at the same time during the year in question.

Child's pension

Pension for a disabled person's child.

Combined pension

When one person receives both a surviving spouse's pension and a retirement or disability pension concurrently, the two pensions are said to be "combined."

Contributor

Employee or self-employed worker who is between the ages of 18 and 70 and pays contributions to the Québec Pension Plan or the Canada Pension Plan (excluding workers whose earnings were less than 1 600 \$ in 1982).

Disability benefits

The disability pension and the pension for a disabled person's child.

Net disbursements

All payments made to beneficiaries. The total includes sums paid retroactively; also, since October 1977, this total has been adjusted to take into account sums recovered and sums withheld from benefits.

New beneficiary

Person receiving a payment for the first time.

New benefit

Benefit paid for the first time; payment may be made after the month in which the benefit becomes payable.

Partition of earnings

Partition of the earnings shown under the names of two former spouses in the Record of Earnings, following their divorce or annulment of marriage.

Record of Earnings

The record where the annual earnings and wages of all Québec Pension Plan contributors are entered. The basic data are provided by the Ministère du Revenu du Québec.

Région

The ten administrative regions of Québec, the other provinces of Canada, and countries other than Canada are considered to be "regions."

Survivors' pensions

The surviving spouse's pension and the orphan's pension.

Commentary: Statistics on the Québec Pension Plan

By Gaston Bernard

Direction de la recherche et de la statistique

The Québec Pension Plan is a universal, compulsory insurance plan for all Québec workers. Its chief components are the contributors, the beneficiaries, and the Plan assets. In this publication, all data respecting contributors and their contributions bear on the year 1982, the last year for which actual data are available. Statistics on the partition of earnings, however, pertain to 1984. Figures on the Plan assets are for the 1983-1984 fiscal year and those on beneficiaries, for 1984.

Contributors and contributions

All workers between the ages of 18 and 60, as well as all those between 60 and 70 who are not drawing retirement pensions, must contribute to the Plan, if their employment earnings are between the minimum and maximum set each year. For employees, the contribution rate is 1.8 % and for self-employed workers, the rate is 3.6 %. For 1982, the wage bracket on which contributions could be paid was between 1 600 \$ and 16 500 \$.

Number of contributors

The number of workers who contributed to the Plan in 1982 was 2 682 874; of these, 93.0 % were employees, 4.6 % were self-employed, and 2.4 % were employees and self-employed at the same time.

Compared with the previous year, the number of contributors declined by 110 166, down 3.9 % from 1981. This is the second biggest decrease since 1966; the greatest was 5.3%, between 1970 and 1971. A little over two thirds of this decrease involved male contributors: there were 74 578 fewer male contributors than in 1981. Despite a drop of 35 588 in female contributors, women represented 37.9 % of all contributors, a rise of 0.3 % over the preceding year.

Participation

The participation rate of Québec workers between 18 and 65 years of age went down markedly, from 67.5 % in 1981 to 63.9 % in 1982. As we have said, this decline is mainly due to the fact that, while there were considerably fewer contributors that year, there was also a rise of 0.5 % in the population aged between 18 and 65.

If we look at the participation rate, we note that the rate for women has decreased, but by much less than that for men. Women's participation slipped from 50.4 % in 1981 to 48.0 % in 1982, whereas that of men decreased by 4.8 % to a level of 80.1 % in 1982.

As for male contributors, the participation rate according to age has declined for all age groups. This is particularly notable in the 18-19 age group, where the rate dropped from 66.8 % in 1981 to 51.3 % in 1982, the lowest level since 1966, when the Plan took effect. With regard to female contributors, we observe two slight increases of 0.2 % in the 40-44 and 60-64 age groups. However, as is the case for male contributors, the most significant decline in participation can be found in the 18-19 age group, where it fell from 44.3 % to 33.0 %.

Contributors' earnings

In the Record of Earnings are listed all actual employment earnings and pensionable earnings of workers who have contributed to the Plan since its inception in 1966. For 1982, the average actual earnings amounted to 17 098 \$ as against 15 763 \$ in 1981, for an increase of 8.5%. There is still a substantial difference between women's and men's average actual earnings (12 823 \$ and 19 703 \$ respectively). However, this difference appears to be lessening, as the percentage ratio of women's average actual earnings to men's climbed from 62.9 % in 1981 to 65.1 % in 1982.

Only pensionable earnings (i.e. wages between the earnings floor and ceiling) are considered for the purposes of the Plan. The average pensionable earn-

ings for 1982 were 11 869 \$; this represents an increase of 9.6 % over 1981. The fact that the average actual earnings of female contributors rose more rapidly than the average actual earnings of males is reflected in the average pensionable earnings. Men's average pensionable earnings were 12 657 \$, which is 1.20 times the average pensionable earnings for women. In 1981, the figure was 1.22.

Earnings may be entered in the Record for some contributors who have not paid contributions. Under the Plan, the earnings drawn by a couple during the period they lived together may be split in two after a divorce or a marriage annulment, if one of the former spouses so requests. The number of applications for partition of earnings rose from 1 827 in 1983 to 2 250 in 1984. Applications for partition were filed for 10.7 % of the divorces granted in 1983 and for 13.5 % of those granted in 1984. There were 17 017 and 16 710 divorces respectively during these two years.

Beneficiaries

The Québec Pension Plan offers workers basic coverage in the event of loss of income stemming from retirement (retirement pension), death (death benefit, orphan's and surviving spouse's pensions), and disability (disability pension and pension for a disabled person's child). Benefits are paid upon request to persons who meet the eligibility requirements, regardless of their place of residence.

As at December 31, 1984, the total number of beneficiaries receiving monthly pensions was 560 905, compared with 485 262 twelve months earlier. This is a net increase of 75 643 beneficiaries. The Plan also paid out death benefits with regard to 20 357 deceased contributors during 1984.

Between January and December 1984, the Régie paid pensions to 103 694 new beneficiaries, an increase of 44 171 compared with 1983. This marked rise results from the coming into force of an amendment to the Act (Bill 20) on January 1, 1984. The new legislation provides

that any person who retires between the ages of 60 and 65 may draw a reduced retirement pension immediately. Thus, in 1984, the number of beneficiaries choosing early retirement was 55 080. Furthermore, the amendment eases the requirements for the disability pension with regard to applicants aged between 60 and 65. Disability pensions were therefore granted during this period to 1 912 beneficiaries who would not otherwise have been entitled. Finally, also because of the amendment, 5 812 surviving spouses whose pension had been discontinued because of remarriage had their pension reinstated.

As of December 31, 1984, the distribution of beneficiaries was as follows: 63,1 % were receiving retirement pensions; 25,5 %, surviving spouse's pensions; 7,0 %, orphan's pensions; 6,4 %, disability pensions; 2,0 %, pensions for the children of disabled persons. The total exceeds 100 % because 22 276 beneficiaries were receiving two pensions at the same time (in the form of combined pensions).

As for place of residence, 0,9 % of the beneficiaries were living outside Canada, 3,6 % in Canada but outside the province of Québec, and 95,5 % in Québec. The Montréal region of course had the greatest proportion of beneficiaries (56,6 %), followed by the regions of Québec (15,2 %) and Trois-Rivières (7,0 %).

Disbursements

In 1984, net disbursements rose by 348,0 million dollars over those for 1983, constituting a new high of 1 556,8 million dollars. This sum can be broken down as follows: 56,7 % was spent for retirement pensions; 26,4 %, for surviving spouse's pensions; 1,0 %, for orphan's pensions; 13,6 %, for disability pensions; 0,3 %, for pensions for disabled persons' children; and 2,0 %, for death benefits.

As against 1983, the greatest increases in net disbursements were observed for retirement pensions (which rose by 29,9 %), surviving spouse's pensions (by 29,4 %), and disability

pensions (by 27,6 %). For the retirement and disability pensions, the rise was caused by the increased number of beneficiaries and the inflation adjustment of January 1, 1984. In the case of the surviving spouse's pension, it should be noted that, in addition to the two factors already mentioned, there was the monthly increase of 73 \$, effective as from January 1, 1984, which was granted to beneficiaries between the ages of 55 and 65.

Average monthly benefits

As at December 31, 1984, retirement pension beneficiaries received an average of 217,62 \$ per month, or 17,29 \$ more than in December 1983. Between 1982 and 1983, the increase had been 24,82 \$. The slackening of this increase between December 1983 and December 1984 is attributable to the fact that the new beneficiaries between 60 and 65 years of age were receiving reduced pensions.

Men were drawing 248,12 \$, as opposed to 158,56 \$ for women — a difference of 89,56 \$. The gap, which was 73,97 \$ at the end of 1983, has widened each year.

As for the surviving spouse's pension, the average amount paid to women was 244,20 \$, whereas that paid to men was 208,34 \$, for an overall average of 242,12 \$ per month.

The average monthly disability pension in 1984 amounted to 424,26 \$. This represented 435,91 \$ for men and 384,82 \$ for women.

Men's wages are higher than women's, and men's periods of contribution are longer. For these reasons, the average monthly retirement and disability pensions are higher for men, and the average surviving spouse's pension is higher for women.

Plan assets

Because the Plan is universal, all workers aged from 18 to 60 must contribute to it, as must those aged 60 years or more who have not begun to draw their pension. A worker's contribution is deducted at source by his employer,

who in turn remits it, along with an equal contribution of his own, to the Ministère du Revenu.

Income

There was an increase of over 170 million dollars in net contributions, for a total of 1 183,6 million dollars in 1983-1984. These contributions were not sufficient to cover the Plan disbursements, which came to 1 340 million dollars, up nearly 240 million dollars from the year before. However, investment income amounting to 974 million dollars easily made up the difference, and the Plan assets again increased.

Total assets

When the Plan was introduced in 1966, the level of contributions was set so that, over the early years, total benefits paid out would not be greater than total contributions paid in. Thus, by December 1984, additional contributions plus investment income had produced assets of 9,9 billion dollars.

The purpose of accumulating these monies is, first, to help finance the Plan by means of investment income and, second, to build up a reserve from which the benefits provided under the Plan may be paid when the effects of demographic changes are strongly felt. It is already foreseen that, by the beginning of the 21st century, persons 65 years of age or over will constitute a much greater proportion of the total population.

Investments

Plan assets are deposited in the General Fund of the Caisse de dépôt et placement du Québec. Since this fund holds the assets of seven depositors, including the Régie des rentes du Québec, it is impossible to know the exact contents of their individual portfolios. However, as Plan monies represent 90,7 % of the net assets of the General Fund of the Caisse, the investment summary of this fund provided below will give a good idea of the Plan's holdings.

The investments of the General Fund may be detailed as follows: 72,9 % of the monies were invested in bonds (62,4 % in public-sector bonds, 1,9 % in corporate bonds, and 8,6 % in foreign bonds); 16,5 % in shares (15,7 % in Canadian shares and convertible securities); 3,8 % in mortgages; 2,1 % in real estate; and 4,7 % in short-term investments.

It is important to note the changes in the General Fund portfolio between 1983 and 1984. In December 1984, foreign securities represented 9,4 % of net assets as against 2,7 % in 1983 (foreign bonds alone constituted 8,6 % of the net assets). Public-sector bonds made up 62,4 % of the net assets, down 5 % from 1982.

For the 1984 calendar year, the overall yield of the General Fund of the Caisse de dépôt et placement was 10,45 %, virtually the same as in 1983.

1 Data on the number of beneficiaries and on total assets are in all cases cumulative, while those provided under the other headings pertain to the year in question only. It should be noted, however, that up to 1979 figures for total assets were given as at December 31 of each year, whereas beginning in 1979, following the change made in the fiscal year, figures are given as at March 31 of each year. Data for net contributions likewise pertained to the calendar year until 1979 and the new fiscal year thereafter.

2 Includes pension and benefit payments.

3 Includes adjustment for accounting purposes to eliminate fees collected under the Act respecting supplemental pension plans (962 000 \$) and related expenses (3 507 000 \$) (1975).

4 Reflects the results of 15 months of operations, following the change in the fiscal year.

5 This amount includes interest paid (13 732 000 \$) on refunds of excess contributions paid to the Régie des rentes by the Ministère du Revenu by means of temporary remittances for the years 1966 to 1977 inclusive.

6 The substantial increase in the number of beneficiaries is the result of amendments made to the Act respecting the Québec Pension Plan (Bill 20).

TABLE 2

NUMBER OF CONTRIBUTORS, FROM 1966 TO 1984

Year	Number of contributors		
	Male	Female	Male and female
1966	1 457 509	623 012	2 080 521

1. In the total, beneficiaries of combined pensions are only counted once. There are two possible combinations: surviving spouse's pension + disability pension, and surviving spouse's pension + retirement pension.

2. Figures refer to the total number of death benefits paid since February 1968.

3. The substantial increase in the number of beneficiaries is the result of amendments made to the Act respecting the Québec Pension Plan (Bill 20).

1981	187.45	188.60	323.19	1 088.25	149.48	178.08	310.09	(182.47)
1982	209.42	207.80	365.26	1 217.73	173.45	196.51	351.87	(207.91)
1983	235.28	225.91	404.79	1 351.28	198.33	214.71	394.44	(234.39)
1984	227.02 ¹	259.83	432.00	1 495.62	216.38	243.81	422.76	(281.89)

It should be noted that the orphan's pension and the pension for a disabled person's child have been 29 \$ per month since January 1974.

1. The decrease in the average monthly amount is the result of amendments made to the Act respecting the Québec Pension Plan, providing for a reduction in the monthly amount of 1/5 % for each month preceding the contributor's 65th birthday.

1. These amounts represent sums paid to the Minister of Finance to cover the collection charges of the Ministère du Revenu.

2. Includes adjustment of 49 267 000 \$ for accounting purposes to eliminate the net profits made on investment sales (1974).

3. Includes adjustment for accounting purposes to eliminate fees collected under the Act respecting supplemental pension plans (962 000 \$) and related expenses (3 507 000 \$) (1975).

4. Includes adjustment of 155 000 \$ taking into account the reimbursement by the Ministère des Affaires sociales of expenses for the administration of the Act respecting supplemental pension plans (1976).

5. Includes adjustment of 6 526 000 \$ for the contribution of the Régie des rentes to the Civil Service Superannuation Plan for years prior to January 1, 1976.

6. Includes adjustment of 6 023 000 \$ required on July 1, 1972, for additional reimbursements to social aid for childless disabled persons under age 35 (1977).

7. The figures appearing in this line reflect the results of 15 months of operations, following the change in the fiscal year.

8. This amount includes interest paid (13 732 000 \$) on refunds of excess contributions paid to the Régie des rentes by the Ministère du Revenu by means of temporary remittances for the years 1966 to 1977 inclusive.

TOTAL	353 776	143 144	39 133	35 857	11 271	560 905	216 205	(22 276)

- Persons receiving combined pensions have been counted once in the total number of new beneficiaries, only where both pensions went into payment in the same month.
- In the total, beneficiaries of combined pensions are counted only once. There are two possible combinations: surviving spouse's pension - disability pension, and surviving spouse's pension - retirement pension.
- Total number of death benefits paid since February 1968.

QUEBEC FAMILY ALLOWANCES

Definitions

Beneficiary

Person receiving a family allowance payment. May be the mother, the father or another person who wholly or largely supports the child or children.

Child

Unmarried child who is below the age of 18 and who is not a ward of the State. The number of children in a family includes all children in the family for whom allowances are paid for a given month.

Family

Includes the beneficiary and all children for whom family allowances are paid. Benefiting families must include at least one child for whom an allowance was paid for a given month.

Gross disbursements

All payments made to beneficiaries for a given period. In the calculation, retroactive payments and allowances annulled are included, but amounts recovered are not.

Handicapped child

Child for whom a family allowance is paid for a given month in accordance with the Act, and who is deemed to be affected by a visual, motor or hearing impairment, mental disorder, or chronic illness.

Region

The ten administrative regions of Québec, and the other provinces of Canada and countries other than Canada are considered to be "regions."

Commentary: Statistics on Québec family allowances**By Yves Nobert**Direction de la recherche et
de la statistique**Family allowances**

The downtrend in the number of Québec children receiving family allowances continued in 1984, although it was less marked than in previous years: the number fell from 1 657 152 to 1 634 132. For the first time in a decade, the decrease over the year was less than 25 000. This is about half the 1977 figure (around 50 800), and a third less than the 1983 figure (33 566). Along with the decline in the number of children, there was a decline in the number of families, noted for the third consecutive year. In 1984, there were about 932 000 families receiving allowances, roughly the same figure as in 1975. The decrease in the number of children and families has resulted in a falloff in the average number of children per family. This average, which was 2.15 in 1974, was 1.75 by the end of 1984.

The decline in the number of children was particularly evident in families having three or more eligible children. From 274 221 in 1974, the figure steadily declined to 147 374 in 1984. Over the past year, there has been a decrease of 6 355 in the number of such families. In 1984, the number of children in these families fell by 23 339, but the number of children belonging to families with one or two eligible offspring grew by more than 300. A third child in the family thus appears to be increasingly rare in Québec.

These general observations must be qualified, depending on whether we are considering central Québec or the outlying regions of the province. Although the overall number of families has lessened by 0.82 %, the Bas-Saint-Laurent – Gaspésie and Abitibi – Témiscamingue regions have shown decreases of more than 1.0 %, and there has been a decline of 3.0 % in the Côte-Nord. Exceptionally, in Nouveau-Québec the number of families rose by 5.3 %. The regions in the Hull-Québec corridor showed decreases lower than the overall average. Accompanying the drop in the number of families was the falloff in the number of children, especially significant in the same regions as those showing fewer families. The decline in the number of children in these outlying regions would have been more appreciable if the size of the families had been smaller. In Abitibi – Témiscamingue and

Bas-St-Laurent – Gaspésie 20.50 % and 18.31 % of families respectively had three children or more, while for the region of Montréal, the proportion was 13.94 %.

In 1984, family allowance disbursements rose by 5 610 700 \$ or 3.09 %, from 181 717 900 \$ to 187 328 600 \$. This increase, which is less than the year's inflation adjustment rate (5.0 % as of January 1, 1984) may be explained by the smaller number of eligible children and the smaller size of families, seeing that the allowance amounts vary according to the number of children and each one's place in the family.

The supplementary allowance for a handicapped child

For the past five years, the Family Allowances Act has provided for the payment of a supplementary allowance to parents who care for a severely handicapped child at home.

In December 1984, the supplementary allowance was being paid for 12 516 children representing 12 097 families. For the past two years, the annual increase in the number of beneficiaries has been around 14.0 %.

As regards the nature of the impairment, the statistics show that 31.44 % of the children were suffering from a chronic disease, 28.59 % were affected by mental retardation or psychological problems, 25.00 % by impaired motor function, and 14.97 % by impaired hearing or vision.

The majority of the benefiting children, 77.53 % in fact, had an impairment of congenital origin. Approximately one fifth were suffering from a chronic disease, and less than 2.0 % were handicapped as the result of an accident.

In 1984, the supplementary allowance was 86.46 \$ per month for each child. Disbursements for this allowance climbed from 10 841 395 \$ in 1983 to 13 009 902 \$ in 1984. This represents an increase of 20.00 %.
